AGRI MUSEUM**

*Sowing dreams,
harvesting living
knowledge*

Farms and food are at the heart of human survival. The world, and Southeast Asia in particular, strives to end hunger, to be assured of having enough food that nourishes its people, and to produce it in a sustainable way. This is especially true in our region where agriculture is the backbone of the economies of its nations and can make it a food basket for the world.

We believe it is critical to show that the fields of agricultural knowledge are full of relevant stories that help us understand agriculture better and how it serves human lives.

We need to create a special homestead, a “living” museum for these stories, where we will SEED the youth’s awareness so that agriculture will be an option they will consider; CULTIVATE consciousness among the media and educators that agriculture is a field that directly affects people’s lives; and BREED empowerment among stakeholders and potential shareholders to bring them to the next level of agricultural engagement.

How The AgriMuseum will tell the story of agriculture in Southeast Asia

Agriculture is the backbone of Southeast Asian economies. Each country in this region prides itself of its unique strengths and bounty enriched by its unique culture and economy.

But Southeast Asian agriculture faces complex challenges. In the face of these challenges, hope springs from game-changing achievements in inclusive and sustainable agricultural and rural development over the years. These game changers, along with the advances in agriculture in the service of life, in turn reveal to us a picture of what lies ahead for Southeast Asian agriculture.

Sections of the AgriMuseum

The Southeast Asian AgriMuseum will harvest living knowledge on agricultural and rural development in the region, and in the process sow seeds of ideas – in the young, the agriculturists, farmers and practitioners, decision-makers, and the general public – for a better future.

1. Milestones affecting Southeast Asian agriculture

2. Unique foodscapes of Southeast Asian countries

3. Lifescope: commonalities of Southeast Asian countries

4. Challenges of Southeast Asian agriculture

5. Hope for Southeast Asian agriculture

6. Future farms of Southeast Asia
